Seeds of Quality

It is our ambition to produce the best seed grown in our lines.

We are devoting a considerable acreage to *Observation* and *Selection* of our stocks, and are *constantly improving existing types*, wherever possible. We believe our strains of the varieties we grow are as good as the best and better than the majority.

Our Lettuce

is the product of individual selection.

Our Onion

is grown from the best types obtainable and the bulbs are carefully re-selected at planting time.

Our Rogueing

is done by experts, and no time or expense is spared in this important work.

Our Cleaning Plant

is the most up-to-date in the country. We have, as far as possible, eliminated all chances of Mechanical Mixtures. All those who have visited it pronounce our plant the "last word" in Seed Cleaning Equipment.

We respectfully solicit your business on quality of stocks, mechanical purity of product and fairness in dealing.

PIETERS-WHEELER SEED CO.

Special Stocks

We are prepared to grow for our customers *Special Strains* of any varieties of seed we list, and are qualified in every way to give such orders expert attention. *Correspondence solicited.*

Improved Lettuce Stocks

After devoting several years to *SINGLE plant selection* we are offering many *improved strains* of Lettuce, each of which is the progeny of a single plant.

New and Improved Types

Each year we are *hybridizing* many hundred plants of the leading varieties, with a view of obtaining *NEW SORTS* and *IMPROVING EXISTING TYPES*.

Expert Rogueing

Our Lettuce crops are *rogued by experts* as many as four times while growing; and we truly believe, from actual comparative trials, that there are *no purer or more highly bred Lettuce stocks produced than those which we are offering*.

Increasing Sales

"There's a Reason"

Our sales of Lettuce have more than doubled in the past three years. Averaging about 300,000 lbs. annually. Of one variety alone, viz.: Our Selected New York, we sold the past season over 80,000 lbs.

We especially recommend the varieties listed in **BLACK FACED TYPE**.

EXTRA QUALITY Onion Seed

Is One of Our Specialties

Onion is very susceptible to cross pollination. In order to eliminate all contamination and to maintain a true type, we are building up our stocks by mother bulb selection from carefully re-sorted bulbs of select strains. Each flower head is selfed by bagging. The seed obtained therefore becomes the product of an individual plant.
